Chaitanya Gomaskar

Full-Stack Developer | Gen-AI Developer

+91 9579725661 | Gadchiroli, MH, India-442605 | chaitanyagomaskar25@navgurukul.org | LinkedIn | GitHub

SUMMARY

Full Stack Developer with hands-on experience building web applications using React, Node.js, Express.js, and MongoDB. Skilled in developing responsive user interfaces, RESTful APIs, authentication, and database integration. Strong foundation in JavaScript and a passion for building clean, secure, and scalable applications while continuously learning modern technologies.

TECHNICAL SKILLS

Programming Languages (JavaScript (ES6+), Python,) | **Frontend** (HTML, CSS, React, Tailwind CSS, Responsive Web Design) | **Backend** (Node.js, Express.js, RESTful APIs, JWT Authentication) | **Databases** (MongoDB, MongoDB Atlas, Mongoose, SQL) | **Developer Tools** (Git, GitHub, Postman, Thunder Client, VS Code, npm, Vercel) | **AI & API Integration** (Google Gemini API, Generative AI Integration, Prompt Engineering, Third-Party API Integration)

PROFESSIONAL EXPERIENCE

Navgurukul,Eternal University, HP, *Academic Facilitator* 03/2026 – 08/2026 | Himachal Pradesh

- Managed daily student attendance and leave records while ensuring accuracy and timely completion of tasks.
- Mentored students and resolved their concerns through active listening, clear communication, and effective problem-solving.
- Planned and coordinated student activities while managing multiple responsibilities and deadlines effectively.
- Developed strong **leadership, communication, time management, decision-making, other soft skills** through regular interaction and collaboration.

PROJECTS

AI-Powered Developer Collaboration Platform, *React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Google Gemini API*

- Developed a full-stack developer collaboration platform enabling users to create and manage projects, collaborate with team members, and organize project resources through a centralized dashboard.
- Implemented secure user authentication and role-based project access using JWT and bcrypt, protecting user accounts and project resources.
- Integrated Google Gemini AI to automate code explanation, technical documentation generation, and README creation, improving developer productivity and simplifying code understanding.
- Built project documentation and file management features, including Markdown-based notes, file uploads, content previews, and contribution analytics to support collaborative development workflows.

GitHub Live Demo

Student Feedback Manager | Full-Stack Web Application, *React.js, Node.js, Express.js, MongoDB, Mongoose*

- Developed a dynamic, full-stack feedback management application enabling users to submit student feedback, ratings, and comments through an interactive web interface.
- Implemented RESTful API endpoints using Node.js and Express.js to handle feedback submissions and retrieve feedback records from MongoDB using Mongoose.
- Integrated persistent database storage and dynamic feedback rendering, ensuring submitted feedback remains available across page reloads and can be retrieved for centralized viewing.

GitHub Live Demo

Agile Issue Tracker, *React, Tailwind CSS, JSON Server*

- Developed a web-based Agile Issue Tracker to streamline project task management, issue tracking, and software development workflows.
- Designed an interactive project management interface to organize development tasks and improve visibility into issue status and project progress.
- Built and deployed the application using a modern web development workflow, making the platform accessible through a live deployment on Vercel.
